	Binary	Choice ≤24	BANK77	CLINC151	Score	Graph	Tariff bound

Unverified: catalog/interface candidate, no successful hosted capability evidence. Adapter limit: declared client restriction.

Bounded/zero tariff: conditional per-attempt quote, not actual billing or permission. Unbounded: native aggregate billing not established.

BANK/CLINC retain all 77/151 options. Graph cells concern surrogate-factor workflows; calibrated/posterior meaning is unknown.

Exact catalog, profiles, cohort and cell-denominator bindings are in plan.json. No quality, latency, calibration or spend result is plotted.
