

FULL OFFLINE COMPARISON

93,046 planned cells: 68894 complete, 24152 unsupported.
Zero failed/unresolved; zero HTTP attempts/API billing. Local monetary expense unknown.
Fixed prior, TF-IDF C1 and HGB100 references; one CPU profile/thread at a time.
Previously observed official tests; no novel held-out or test-driven selection claim.

METHOD AND PROBABILITY MEANING

Intervals: 2,000 input-grouped percentile bootstrap draws (95%).
Macro F1 averages the complete declared vocabulary, including absent Wine bin0.
Estimated class probabilities / training-label frequencies are explicit meanings;
they are not established calibrated posteriors.
Wine accuracy uses genuine probability argmax; MAE/RMSE use raw bin-index scalars.

CANONICAL TEST / SEPARATELY REFITTED CLEAN SENSITIVITY

canonical / clincl50 / prior
Valid/planned 5500/5500; groups 5500; accuracy 0.181818 [0.171273, 0.192182]

FIVE-FOLD BANK VALIDATION

prior: accuracy 0.018694; 95% [0.016092, 0.021494]; 10003 physical rows / 9999 input groups.
tfidf-logistic-C1: accuracy 0.859242; 95% [0.852159, 0.866100]; 10003 physical rows / 9999 input groups.
00F 95% intervals condition on fixed predictions and exclude correlated
shared-training/refit uncertainty; overlapping fits are not independent repeats.

OOS / WINE / CONTROL LIMITS

Canonical CLINC C1 OOS: TP 354, FP 58, FN 646, TN 4442; recall 0.354000, precision 0.859223, F1 0.501416. All 1000 planned OOS rows completed; official 'oos' is unchanged.
Wine bin0 (grades0-2) has no source observations; bin4 has five white grade9 rows, including one test row. Grade10 is absent. Extreme-bin performance cannot be generalized from these counts.
Wine empirical H(original grade | bin): full 0.895168 bits, selected test 0.891319 bits. This is information lost by binning, not prediction error.
Wine argmax classification and raw scalar ordinal MAE/RMSE are separate axes.
14 matched groups / 42 quality rows: rule agreement1, uniform tie agreement0.
Mechanism checks of joint ordered presentation; no learned-model causal claim.

CUSTODY / REPRODUCTION

Inference and reduction source: 9b69c7c0; accepted1508 unit tests/93.14265% coverage.
Nine SDK reports regenerated independently; all manifests/heads/journals held.
Canonical and clean fitting cohorts separate from post-hoc filtered report rows.
No gate transfer, model search, native/hosted request, funding or clock reset.
Component fit/setup/profile observations are not a GPU timing or cost frontier.
Portable prepared/view commands and recipes: docs/datasets.md.
